

NEW PRODUCTS

Discover what's new in safety signage and workplace solutions

Inside, you'll find a snapshot of some of the latest additions featured in our Edition 26 Safety Signs Catalogue, including innovative designs, expanded ranges, and customer-inspired updates.

INTRODUCTION

We're delighted to present a selection of new and innovative products that reflect our ongoing commitment to workplace safety, compliance, and quality. While this brochure showcases just a small sample, there are over 1,000 new products, materials, and updates waiting to be explored in our full Edition 26 Catalogue – our most comprehensive release to date.

Inside, you'll find: Fresh product designs inspired by customer feedback, Expanded categories to meet evolving safety standards, Guidance on materials, finishes, and ordering options. Whether you're refreshing your signage range or looking to expand your safety offering, Edition 26 has everything you need to stay compliant, visible, and ahead of the curve. **Request your copy today and discover the difference that quality signage can make.**

CUSTOM EMERGENCY ESCAPE SIGNS

Assist the fire and rescue service in identifying each level of a building. We understand that the variations required for these are endless, therefore we have introduced a custom range to help.

ACRYLIC STAND-OFFS

High-quality signs that sit slightly away from the wall to create a "floating" effect. These contemporary, eye-catching signs are ideal for use in a wide range of environments, such as hotels, retail, offices, etc.

THINK GREEN SIGNS

Environmental conservation is not just a responsibility but a necessity for the well-being of our planet. Promote an energy and resource efficient, responsible business image.

PAVEMENT PARKING SIGNS

It is now illegal to park on pavements in London and Scotland. The Department for Transport (DfT) has announced it is considering bringing the rest of the United Kingdom in line.

BRAILLE & TACTILE

Create environments that are welcoming and accessible to everyone. Bespoke braille signs promote a culture of inclusivity and enhance communication and navigation for those who rely on tactile reading.

HEALTH & WELLBEING POSTERS

A range of signs and posters providing knowledge and guidance for healthier mental and physical wellbeing. Ideal for communal areas such as staff rooms, waiting rooms or open plan office spaces.

Whether you're looking for a specific sign or need a completely bespoke solution, we're here to help you find exactly what you need - our team will work with you to create the perfect solution.

CONTENTS

To help find the sign or product you are looking for use the contents table below to quickly navigate to the relevant section. Remember, if you don't find the exact message, size or material you are looking for please ask and we will provide a quote for your exact requirements, or contact us to request a copy of our main safety signs catalogue with thousands of additional products to choose from.

INTRODUCING OUR LABEL PRINTING CAPABILITIES

We offer versatile label printing solutions that cater to the diverse needs of businesses across multiple industries. Using our the state-of-the-art label printer, we are able to help you create eye-catching, custom labels in-house with unparalleled ease and flexibility. Whether you need a unique one-off label design or a run of hundreds of rolls, our printing services will help you stand out with precision, vibrant colours, and cost-efficient results.

VERSATILE APPLICATIONS

Compliance Labels: We manufacture high-quality compliance labels designed to meet strict international regulations for hazardous goods and chemical identification. Our labels are engineered to ensure maximum safety, clarity, and durability across a wide range of industries and environments. Whether you require labels conforming to ISO 7010, ADR, GHS/CLP, or IATA standards, we provide fully compliant solutions that support safe handling, transportation, and storage of hazardous materials. These are just a few examples of the comprehensive range of regulatory labels we offer—each produced with precision to help your business maintain full compliance and uphold the highest safety standards.

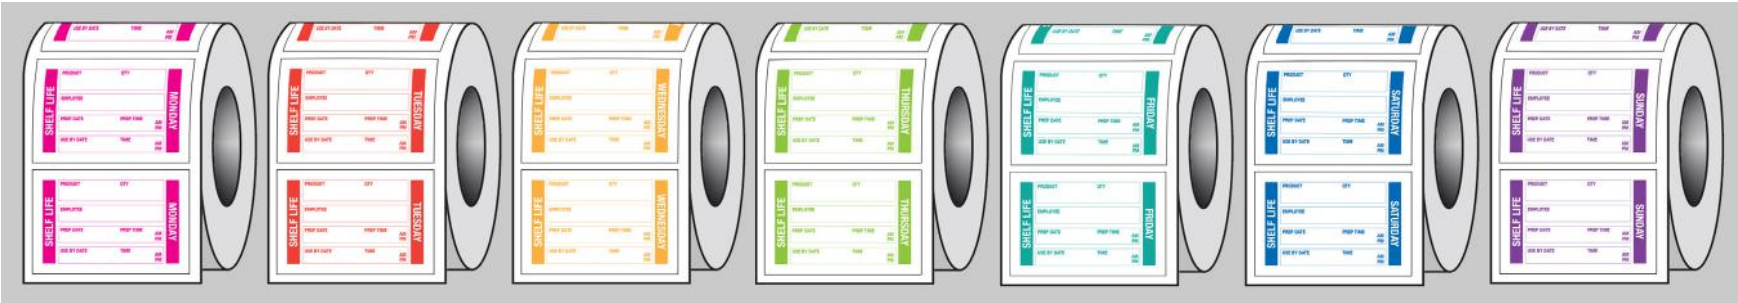

Durable Labels: Our robust, high-performance labels are specifically engineered for demanding environments where long-lasting durability is essential. Designed to withstand harsh outdoor conditions, they offer exceptional resistance to UV exposure, extreme temperatures, and weathering. In industrial settings, our labels provide superior protection against oil, chemicals, abrasion, and moisture, ensuring that critical information remains clear and legible over time. Whether used on machinery, equipment, containers, or outdoor signage, these durable labels deliver reliable performance and dependable identification in even the toughest conditions.

Product Labels: Perfect for food, beverages, cosmetics, and household goods, our product labels are crafted to help brands stand out while clearly conveying quality, functionality, and identity. With vibrant printing, precise detailing, and a wide range of materials and finishes, these labels enhance shelf appeal and support strong brand recognition. Whether you're looking to showcase premium ingredients, highlight sustainability, or communicate essential product information, our labels provide a professional, eye-catching solution that elevates your packaging and connects with consumers.

FOOD LABELS Rolls of 100 - 75 x 50mm - Food Safe Removable Polypropylene

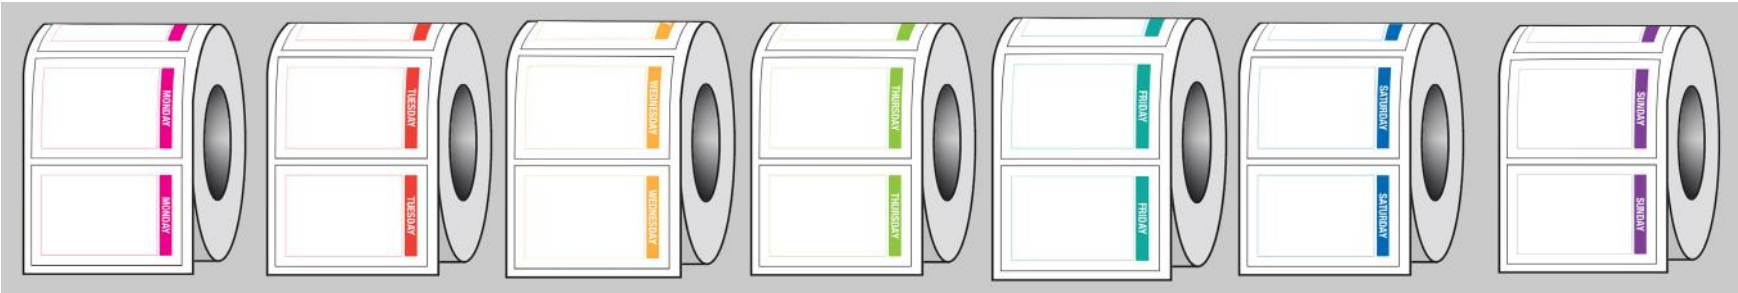

A food labelling system can be used as part of your HACCP (Hazard Analysis Critical Control Points) Plan and will enable you to show the Health Inspector that your kitchen is safe. When correctly used food labelling can ensure that the food is in date, fresh, there is no cross contamination, and that allergens are correctly identified. Manufactured from a food-safe, removable polypropylene material with a matt finish for easy writing onto. The labels can be peeled away from plastic containers etc as and when required.

These shelf life labels are good for ensuring that the First in First out (FIFO) procedure is done efficiently and can help reduce food waste.

SHELF LIFE

CUSTOM ROLLS OF LABELS

Supplied on high gloss self-adhesive vinyl, simply choose your required size and shape, then advise us of your preferred message and design. These options are a convenient and cost-effective way to create professional, durable, and eye-catching labels tailored to your needs. These labels are ideal for branding, product packaging, safety notices, or promotional use. The high gloss vinyl ensures a premium finish that resists moisture, fading, and wear, while the self-adhesive backing allows for easy application on a wide range of surfaces. Ordering them in a roll format also makes storage, handling, and application faster and more efficient, whether for business or personal use.

EXTERNAL FLOOR GRAPHICS

Due to popular demand, we've introduced a superior, hard-wearing grade of floor graphics – specifically engineered for external use. Our new aluminium-based, R12 slip-rated material offers exceptional durability and adhesion on a wide range of surfaces including asphalt, concrete, stone, metal, and stairs. Designed to handle heavy footfall and light vehicle traffic, these graphics are ideal for outdoor safety messages, events, wayfinding, and parking areas.

Easy to install and built to conform to uneven surfaces, these long-lasting, high-visibility graphics deliver both performance and impact – helping your messages stay seen, whatever the weather.

CUSTOM EXTERNAL FLOOR GRAPHICS

A great solution to highlight potential dangers or identify warehouse aisle / bay letters and numbers. Simply supply us with your message of choice, logo or photograph and we will print your floor graphic.

400 x 600mm
Internal Floor Graphic **£8855**
External Floor Graphic **£3556**

400mm Dia
Internal Floor Graphic **£8862**
External Floor Graphic **£3557**

External floor graphics in warehouses and loading bays play a vital role in improving safety and organisation. They provide clear, visual communication that helps prevent accidents by marking hazardous zones, pedestrian walkways, and vehicle routes. By clearly defining danger areas and safe paths, these graphics help reduce workplace injuries and improve overall safety compliance.

Beyond safety, floor graphics enhance traffic flow and operational efficiency. Directional arrows, loading bay numbers, and designated waiting zones help drivers, workers, and visitors navigate the area quickly and accurately. This organization minimises congestion, reduces delays, and supports faster loading and unloading operations. The use of durable, weather-resistant materials also ensures these markings remain visible and effective even under heavy use and exposure to outdoor elements.

Finally, external floor graphics contribute to efficiency and visual management within a warehouse or logistics environment. They support lean practices such as 5S by keeping areas well-marked and organised, making it easier for staff to identify where equipment, goods, or vehicles should be positioned. Custom graphics can also include branding or compliance messages, reinforcing company standards while maintaining a professional and orderly work environment.

FIRST AID DRY WIPE BOARDS

Keep emergency details clear and up to date. Place these in busy or high-risk areas such as receptions, staff rooms, and near first-aid stations for maximum visibility.

FIRST AID, MENTAL HEALTH & WELLBEING

Using mental health and wellbeing posters in the workplace helps normalise support, encourage conversations, and guide employees to resources, just as AED signs clearly point people to lifesaving tools in an emergency. Together, these visual cues create a safer, more supportive environment where both emotional and physical wellbeing are prioritised.

FULLY BESPOKE LOCK OUT TAG OUT STATIONS

We can offer alternative sizes and layouts to meet your exact needs—just let us know your specifications, and we'll provide a personalised quote. Options include custom dimensions, orientations, colors, and designs to ensure your signs are perfectly suited to your workplace, making them both effective and compliant.

These custom lock out tag out stations come complete with shadows of equipment types helping to highlight when equipment is in use, provides easy inventory checking and shows when replacements are required. A tailored station can include visual instructions, colour-coded sections, and company branding, making it easier for employees to follow safety protocols consistently and reinforce a culture of compliance. Overall, a custom LOTO station not only improves efficiency but also significantly enhances workplace safety and regulatory adherence.

LOCK OUT TAG OUT STATIONS

Lockout tagout stations ensure all safety equipment is easily accessible from one central location, helping workers lock out machinery quickly and correctly. The design ensures they remain highly visible wherever they're placed, making it simple for staff to find what they need in an emergency or during maintenance. These stations are pre-printed, as seen. Simply insert the hooks into the pre-drilled holes and secure the contents. The 5mm foam board is easily drilled for wall fixing.

KEY STATION

This numbered key station is used to organise and manage keys in a clear, systematic way. Each key is assigned a specific number that corresponds to a hook on the station, making it easy to identify and locate keys quickly. This system reduces confusion, prevents misplacement, and saves time, especially in industries with many vehicles, doors, or pieces of equipment.

In addition to organisation, numbered key stations improve accountability and security. By assigning each key a number, staff can track which keys are checked out or in use.

CUSTOM SHADOW BOARDS

Introducing our innovative solution for workplace organisation and efficiency: custom shadow boards. Streamline operations and enhance workplace safety by providing a centralised location for storing and organising tools and equipment. By visually displaying each item's designated location on the board, employees can easily identify missing items, thereby reducing the risk of misplaced tools, and improving inventory management. With a variety of options available, our custom shadow boards are ideal for maintaining a tidy and efficient workspace.

Everything available in a custom option plus the ability to edit the size of the shadow board, include additional or alternative equipment or create a free-standing shadow board. The design options are limitless.*

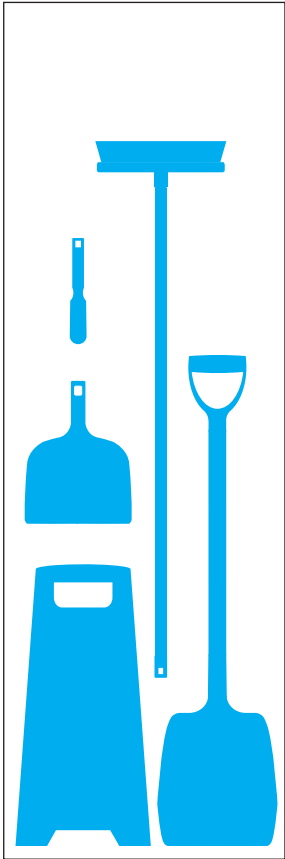

*sizes may vary depending on equipment requirements.

CUSTOM SHADOW BOARDS / CLEANING STATIONS

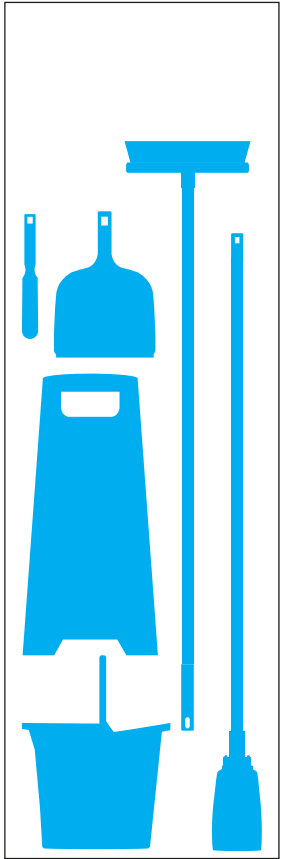

5S and 6S shadow boards are invaluable tools designed to enhance organisation and efficiency in workplaces of all types. By allocating a specific location for each tool or piece of equipment, shadow boards ensure that items are always stored properly and can be found quickly when needed. The distinctive outlines, or shadows printed onto the board provide an instant visual cue if something is missing, drastically reducing the time workers spend searching for tools. Beyond organisation, shadow boards contribute significantly to workplace safety and cleanliness. In environments such as manufacturing plants, workshops, laboratories, and construction sites, misplaced tools and cluttered work areas can create serious hazards. By encouraging workers to return tools to their designated spots, shadow boards reduce the risk of tripping, falling, or accidental misuse of equipment.

- There are many important benefits by using a shadow board system such as:
- 1. Systematic storage in an organised manner.
 - 2. Improved productivity due to the ease of locating tools.
 - 3. Accountability - missing items are quickly identified.
 - 4. Space utilisation is improved by storing items neatly.

REFLECTIVE FENCE PANEL

Boost visibility and enhance site safety with our Reflective Fence Panel, designed for quick deployment and universal fit.

Manufactured from superior-grade R2 prismatic, quilted and embossed PVC, this panel delivers exceptional reflectivity and durability in all light conditions – making it ideal for construction sites, pedestrian cordons, events, or roadside services.

The panel features elastic straps and reinforced eyelets for versatile fixing options. It fits effortlessly onto Heras-style fencing, site hoarding, skips, plant equipment, or scaffolding – improving visibility for both pedestrians and vehicle operatives.

Its rollable design ensures easy transport and compact storage, while the bold red and white chevron pattern provides a high-visibility visual cue to proceed with caution. A cost-effective, reusable solution to increase safety and awareness across a wide range of environments.

DRY WIPE COURTESY SIGN

Part 1: Design of the Chapter 8 Traffic Signs Manual (D4.15.5) states that "This sign for pedestrians gives details about the nature of street works, giving name of employer and contractor, emergency telephone number, and apologies for inconvenience. Signs must be sited where they will not cause an obstruction." These signs can be supplied with alternative sizes and messages upon request.

This 600x450mm Zintec metal sign is supplied complete with dry wipe areas so the sign can be re-used and updated for multiple jobs. When ordering please provide the necessary information and logo for inclusion. Can be placed inside a sign frame (58553 – sold separately) for displaying on site.

Key Features:

- Custom printed Company Name (and logo – optional)
- Custom printed Job Description/Information
- Dry wipe area for Contractor Name, Expected Completion Date, Emergency Telephone Number, and Permit Number
- Apologies for any inconvenience

PROTRUDING LOAD MARKER SIGNS

Where a projecting load is carried or a projecting special appliance is permanently fitted to a vehicle, red and white marker boards conforming to the requirements as prescribed in schedule 12, Part 11 of the Road Vehicles (Construction and Use) Regulations must be fitted to the vehicle or load.

Front and rear projection markers must:

- Be as near as is practicable in a transverse plane
- Not be more than 0.5m from the extreme end
- Not be more than 2.5m from the road surface
- Be clearly visible, within a reasonable distance.

LEFT HAND PASSENGER SIDE

MATERIAL	SIZE	CODE
PVC Banner	1520m x 300mm	5 3713

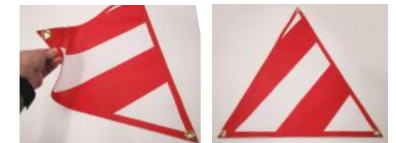

REAR

MATERIAL	SIZE	CODE
PVC Banner	685m x 610mm	5 3712

RIGHT HAND DRIVER SIDE

MATERIAL	SIZE	CODE
PVC Banner	1520m x 300mm	5 3714

A load must be made clearly visible if the length of projection is between 1 and 2 metres. Marker boards are required if the load projects rearwards or forwards by more than 2 metres. Marker boards are required if there is over 305mm projection on either side of the vehicle.

SITE SPEED LIMIT SIGNS

A National Highways Safety Alert in 2025 (NHA359) highlighted the need to reduce potential driver confusion at construction sites by using only words rather than the numerical versions seen on public highways (as per TSRGD Fig.670 speed roundels). If you require alternative speeds please specify. This alert follows reports of incidents where drivers and vehicle automation systems misread works' speed limits, leading to sudden braking and hazardous situations in temporary traffic management zones.

ELECTRIC SCOOTERS

This sign should be used in areas like walkways, shopping centres, or building entrances to prevent accidents and maintain pedestrian safety by clearly prohibiting the use of scooters in the area.

MANUFACTURING PROCESSES

Our sign manufacturing process includes screen printing, digital printing, vinyl graphics, engraving, embossing, and many other techniques, allowing us to produce high-quality, durable, and visually striking signs for any environment. Each method is chosen based on the material, intended use, and longevity requirements to ensure clarity, legibility, and resilience under different conditions.

Quality is critical in signage because signs are not just decorative—they communicate vital safety information, instructions, and directions. High-quality manufacturing ensures that colors remain vibrant, text stays readable, and signs withstand wear, weather, and daily handling, ultimately protecting people, maintaining compliance, and enhancing the professionalism of your workplace. By combining advanced techniques with careful quality control, we ensure every sign is reliable, effective, and built to last.

SCREEN PRINT

This method is used for printing the majority of the safety signs in this catalogue, ensuring a consistent, high-quality print with a sharp, flawless finish. It produces vibrant colors and crisp text that remain clear and legible from a distance, which is essential for safety signage. Highly durable and resistant to fading, scratches, and everyday wear, it is suitable for both indoor and outdoor use. The process accurately reproduces complex designs, detailed graphics, and multiple colors, ensuring every sign meets regulatory standards while maintaining a professional and long-lasting appearance. This reliability helps communicate safety information effectively, supporting both workplace compliance and overall safety, while providing a polished, professional look that enhances any environment.

DIGITAL PRINT

The method of printing is ideal for short production runs, custom designs, or signs that require full-colour images to be included. We can digitally print directly onto a wide range of materials, including plastics, metals, and laminates, giving you flexibility in both design and application. This process allows for precise reproduction of intricate graphics, gradients, and photographic images, ensuring that every detail is captured accurately. Additionally, digital printing offers quick turnaround times and the ability to make last-minute adjustments, making it perfect for bespoke projects or signage that needs to reflect updated information. The result is high-quality, durable, and visually striking signs that meet both aesthetic and functional requirements.

VINYL GRAPHICS

Computer-cut vinyl graphics can be applied to a variety of substrates, such as rigid plastic, aluminium, acrylic, glass, or even vehicles, and can also be supplied pre-cut and ready to apply for convenience. Vinyl lettering and graphics are highly versatile, ideal for both indoor and outdoor use, and can adhere to flat, dry, and clean surfaces with ease. This method allows for precise, sharp edges and intricate designs, making it perfect for logos, safety signs, directional signage, and decorative applications. Vinyl is also durable and weather-resistant, maintaining its appearance over time while withstanding exposure to sunlight, moisture, and general wear and tear. Its flexibility and range of colours make it a cost-effective solution for customized, professional-quality signage.

ENGRAVING

Our cutting-edge laser engraving machines provide unmatched precision, speed, and versatility for creating custom signage. Each sign is designed and manufactured from durable materials such as acrylic, aluminium, wood, and plastics, ensuring long-lasting performance even in demanding environments. The laser engraving process allows for intricate designs, fine text, and detailed logos to be reproduced with exceptional clarity and consistency. It also creates a professional, permanent finish that won't fade, peel, or wear over time, making it ideal for both indoor and outdoor applications. With the ability to handle complex and bespoke designs quickly, our laser engraving ensures every sign meets exact specifications while maintaining the highest quality standards. This combination of durability, precision, and aesthetic appeal makes laser-engraved signage a reliable choice for safety, directional, and corporate applications.

OUR CODES EXPLAINED

- The bold number (**1 & 2**) at the start of the code represents the available materials
- The four digit number represents the sign code (4021)
- The letters represent the available sizes. Landscape are squares. Portrait are circles.
